

EX78000 Series

Hardened Managed 4 to 10-port 10/100BASE
(8 x PoE) and 2-port Gigabit Ethernet Switch

Overview

EtherWAN's EX78000 Series provides a hardened 12-port switching platform supporting 60W Power over Ethernet, high performance switching with robust management features required for mission-critical and harsh environments where sustained connectivity is crucial.

The EX78000 Series is equipped with 8 10/100BASE-TX PoE ports, in combination with two Gigabit SX/LX/BX/WDM Fiber ports with 100 /1000BASE SFP options. The Ultra PoE ports provide up to 60 Watts per port with a total power budget of 240 Watts. This ensures maximum versatility when used in conjunction with powered devices having different bandwidth and power consumption requirements. Applications include outdoor PTZ (Pan-tilt-zoom) dome cameras, wireless access points, and way-side communication devices.

With support for EtherWAN's Alpha-Ring protocol, fault recovery times are guaranteed to be under 15 milliseconds, making these switches ideal for applications that are intolerant to interruption. Robust management features include IPV4/IPV6 protocols, port security, IGMP snooping, port-based VLANs, GARP protocols, and link aggregation. Management is via web browser, Telnet, SSH, SNMP, TFTP, and RS-232 console interfaces.

With the hardened specifications, the EX78000 can operate in ambient temperatures from -40 to 75°C (-40 to 167°F), and in locations where high electrostatic discharge, shock, and vibration may be present.
